

26 April 2017

Viewing of Video - Year 10 Science “An Everyday Miracle” from the BBC Series “The Human Body”

Dear Parents/Caregivers

As part of the Year 10 Science Course the students are currently studying reproduction in humans. To assist with the students gaining a full appreciation of the concepts involved in this area, a documentary video is available for use in the classroom. The video is of an educational nature and is in line with the Catholic, Christian values espoused by the ethos of St John Paul II Catholic College.

However, the video displays images of the naked male and female body. With this in mind your son/daughter will need your permission to view the video in the event that their teacher wishes to use this resource. The video intended for use is The Human Body Series.

If you do not approve of your son/daughter viewing the video, alternate work will be arranged for him/her under separate supervision.

Should you wish to discuss the use of the video please contact Mrs Sheehy at the College on 9208 7200.

Please complete the permission form below and return it to your son's/daughter's Science teacher no later than Monday 8 May 2017.

Mrs. R. Sheehy
Learning Community Facilitator, Science
